18 SS – Disaster Recovery Program

<b>Project Description</b>		<input checked="" type="checkbox"/> <b>On Target</b> <input type="checkbox"/> <b>Concern</b> <input type="checkbox"/> <b>Warning</b>	
<b>IT Project Manager: Frank Juarez</b>		<b>Business Project Owner: Mark Ewalt</b>	
<b>Start Date: 4/1/2014</b>		<b>Target Completion Date: 9/15/2014 **On Hold**</b>	
<p>Currently the AS IT team backs up data from our storage devices and file servers to a local SAN device located in the Carol Little building. Although having data backups gives us some capability for recovering any lost data it does not give us the ability to recover data and resume systems operations if the Carol Little building or the ITS data center is compromised or unable to function due to local emergencies effecting its operations.</p> <p><b><u>AS IT Disaster Recovery Program Description</u></b></p> <p>This program will limit the disruption to our Auxiliaries organization in the wake of a disaster or other critical outage. This plan once fully implemented will allow the organization to quickly resume mission-critical functions, and minimize the negative effects of a disaster. These file servers; storage devices and other critical system will be located at our offsite co-location facility located in Arizona.</p> <p><b><u>Benefits</u></b></p> <ul style="list-style-type: none"> <li>• Restoration of Servers.</li> <li>• Restoration of Network Storage devices</li> <li>• Restoration of critical Business Systems.</li> <li>• Re-provisioning of the Auxiliaries Local Area Network to meet the immediate business needs.</li> <li>• Minimize the down time during any disaster or critical outage.</li> </ul>
