| <p>AS IT has received a notification from Carlson Rezidor Hotel Group that they have selected Merchant Link as the new credit card gateway vendor. The Gateway vendor provides the software that will link Opera to the credit card processor.</p> <p>This is a required upgrade as the existing Gateway Protobase will reach end-of-life on September 30th. **If the upgrade is not complete before September 30th, the hotel will not be able to process credit cards**</p> <p>Merchant Link software leads the industry and will provide the capability for improved credit card processing in the future. Merchant Link's software is called Transaction Vault – a proven, cost-effective tokenization solution. As a cloud-based tokenization solution, Transaction Vault ensures that stored payment data is completely removed from the local IT environment.</p> <p>(Tokenization is the process of replacing sensitive data with unique identification symbols that retain all the essential information about the data without compromising its security.)</p> | |

| <p>Currently the AS IT team backs up data from our storage devices and file servers to a local SAN device located in the Carol Little building. Although having data backups gives us some capability for recovering any lost data it does not give us the ability to recover data and resume systems operations if the Carol Little building or the ITS data center is compromised or unable to function due to local emergencies effecting its operations.</p> <p><u>AS IT Disaster Recovery Program Description</u></p> <p>This program will limit the disruption to our Auxiliaries organization in the wake of a disaster or other critical outage. This plan once fully implemented will allow the organization to quickly resume mission-critical functions, and minimize the negative effects of a disaster. These file servers, storage devices and other critical system will be located at our offsite co-location facility located in Arizona.</p> <p><u>Benefits</u></p> <ul style="list-style-type: none"> • Restoration of Servers. • Restoration of Network Storage devices • Restoration of critical Business Systems. • Re-provisioning of the Auxiliaries Local Area Network to meet the immediate business needs. • Minimize the down time during any disaster or critical outage. | | | |
