12 HSP – MICROS Point of Sale System Implementation

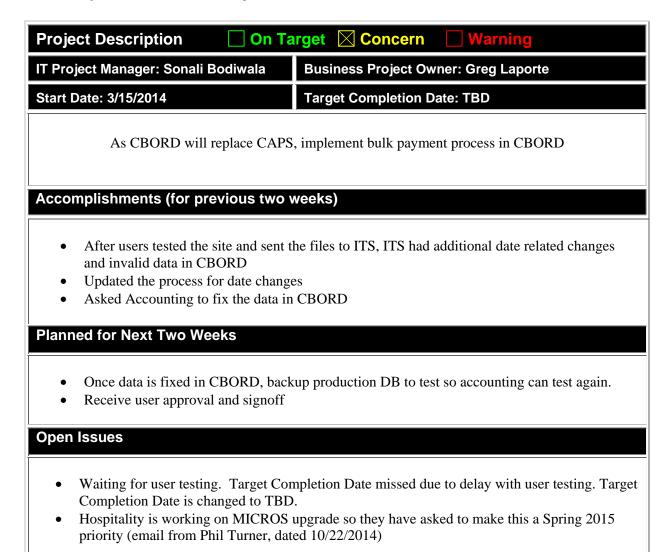

- MICROS team is testing the functionality on the latest application release.
- Project implementation has been set to TBD
- **Exchange POS Terminals for Wireless Tablets**
- Confirm Tablet Encryption method

13 UCP - Create a new website for EMBA

14 SS - Replace CAPS Bulk Payment Process in CBORD

15 COL - Coliseum Food and Beverage PCI Pre-Audit Review

USC is a PCI Level 2 Merchant and as such is required to have an external PCI assessment performed on an annual basis. In 2013 the LA Memorial Coliseum and Sports Arena were excluded from the external audit based on the timing of the take-over date.

The scope of this project is to work with the USC Merchant Services, ITS, and Legends organization to determine level of PCI responsibility for the Coliseum and Sports Arena food and beverage concessions. Additionally, this project will review all concession credit card technical architecture, system and processes for compliance to the PCI DSS. A remediation list of all non-compliant items will be created and tracked to completion.

Accomplishments (for previous two weeks)

- Met with Legends IT Management to discuss approach and responsibilities for PCI Compliance
- Sent Scope, Timeline, and Responsibilities documents to Legends for review

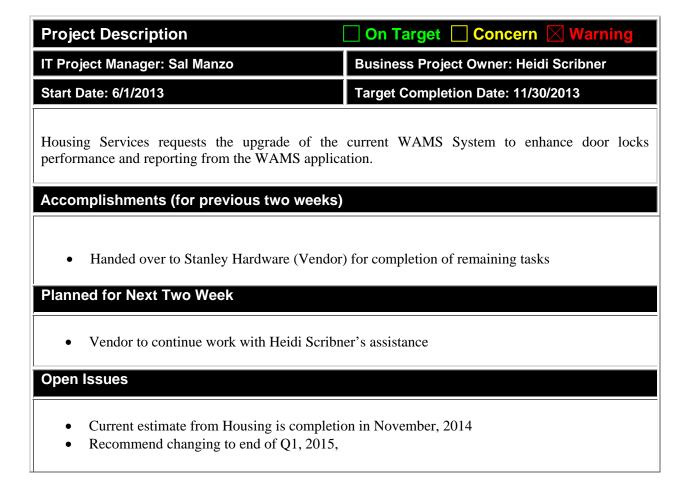

Planned for Next Two Week

- Conduct Legends meeting
- Revise remediation list based on meeting

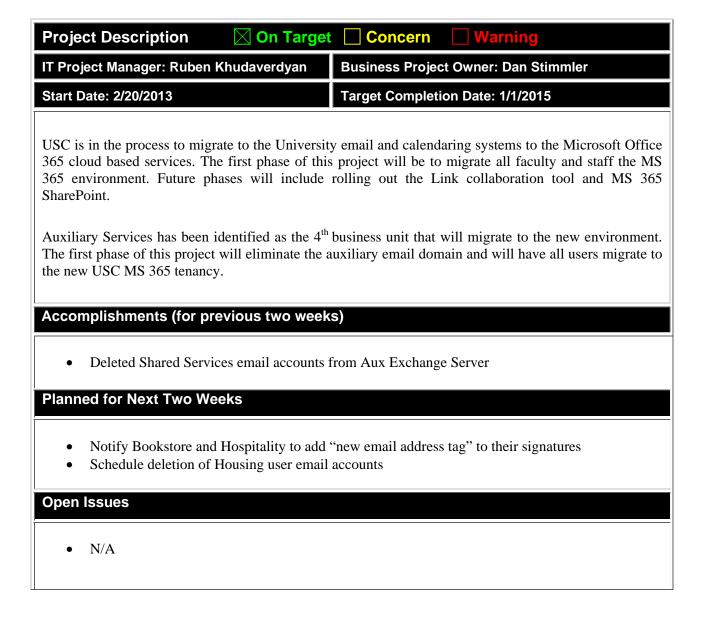

Open Issues

• To date Legends has not responded to request for detail meeting. This will be escalated to Legends Senior Management if no response is received by 11/14

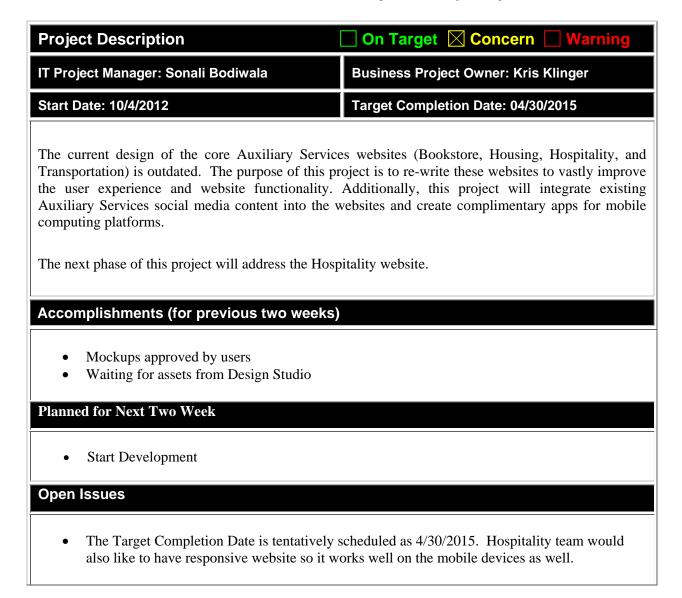

16 HOU – WAMS Server Implementation Phase II

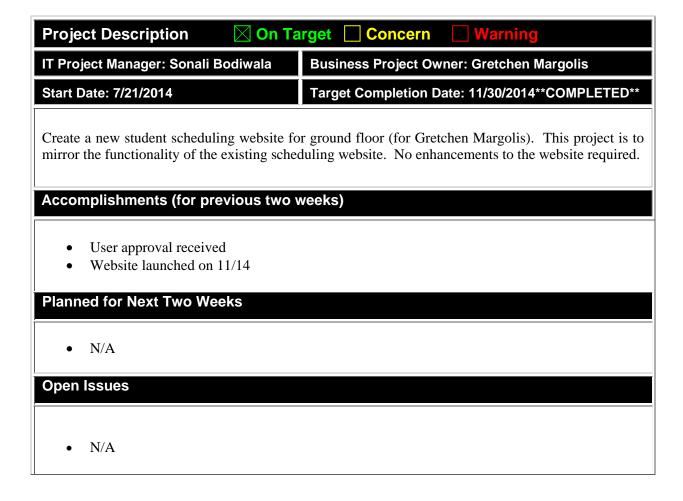

17 SS – MS 365 Email Implementation Phase II

18 HSP - AS Business Unit Website NextGen Project – Hospitality

19 BKS – Create a Student Scheduling Website for Ground Floor

20 COL - Ticket Office PCI Compliance

AS IT will be evaluating the Payment Card Industry (PCI) Compliance of the Ticket Office credit card processing process at the Coliseum and the Sport Arena. During this assessment period, Ticket Office service level A-D will be determined, and based on the identified information, a PCI Data Security Standard (DSS) Self-Assessment-Questionnaire (SAQ) V 3.0 with corresponding level will be used to evaluate the Ticket Office credit card processing process.

In addition, AS IT will review the existing server and hardware implementation by Ticketmaster and recommend a solution that will reduce the overall PCI exposure.

Post assessment period, AS IT will implement processes, procedures, and/or technical infrastructure required by the PCI-Counsel to meet PCI Compliance.

The areas in scope for this evaluation are the main Ticket Office located at the Sports Arena along with Gate 4 and Gate 19 located at the Coliseum.

Accomplishments (for previous two weeks)

- Met with Ticket Office Staff and reviewed back office credit card handling process
- IT related requirements for the PCI audit have been met (documentation only)
- Complete necessary SOP's required for the external audit

Planned for Next Two Week

21 SS – Disaster Recovery Program

Currently the AS IT team backs up data from our storage devices and file servers to a local SAN device located in the Carol Little building. Although having data backups gives us some capability for recovering any lost data it does not give us the ability to recover data and resume systems operations if the Carol Little building or the ITS data center is compromised or unable to function due to local emergencies effecting its operations.

AS IT Disaster Recovery Program Description

This program will limit the disruption to our Auxiliaries organization in the wake of a disaster or other critical outage. This plan once fully implemented will allow the organization to quickly resume mission-critical functions, and minimize the negative effects of a disaster. These file servers, storage devices and other critical system will be located at our offsite co-location facility located in Arizona.

Benefits

- Restoration of Servers.
- Restoration of Network Storage devices
- Restoration of critical Business Systems.
- Re-provisioning of the Auxiliaries Local Area Network to meet the immediate business needs.
- Minimize the down time during any disaster or critical outage.

Accomplishments (for previous two weeks)

- Continue configuration of replication sites
- Requested switch replacement configuration from ITS
- Replace faulty switch at Sunguard, AZ
- Continue replication testing and confirm functionality
- Begin initial Technical documentation

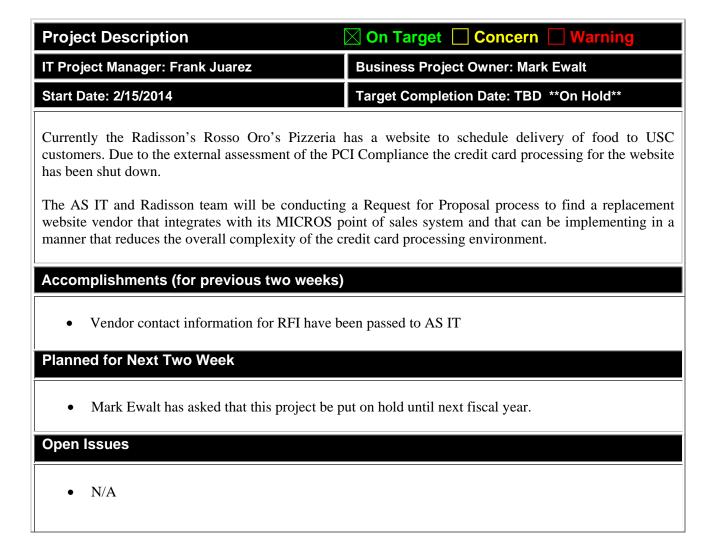

Planned for Next Two Week

• ** Due to project resource availability and higher priorities this project is being temporarily put on hold **
